High Frequency Press and Weather

W9FO will appreciate confirmation of schedules you are copying above 3000 KC (below 100 metres). These are for the benefit of ships at sea, and the majority of these schedules are interrupted by a three-minute "silent period" at the 15th and 45th minute of each hour. At these times all ship operators are standing-by on 500 KC (600m) for SOS calls of ships in distress.

Note that time given is GMT (Greenwich Mean Time). U. S. Eastern Standard Time PLUS FIVE HOURS = GMT. BB = Major League Baseball Scores. CQ = General call, to all stations. Px = Press News. SX = Stock market quotations. Tx = Time signals. If followed by a number, means only that number quoted. From New York Exchange unless otherwise stated.

Many thanks to operators of KUP, WFD, WHD, WRH, and others, for their help.

INSTRUCTOGRAPH
Code Teacher

For the beginner, Instructograph Automatic Code Teacher provides the necessary practice to become a real operator. No experience is necessary. The Book of Instructions explains each step, just as an instructor would do—and you can practice at whatever time or place suits you best.

You learn rapidly—"I have had the Instructograph one month and, with no previous experience, have developed a speed of 8 words per minute," writes one user.

For the near-expert—the man who can't seem to make headway beyond a certain speed—Instructograph can be a big help. It's ready to use whenever you want to practice—at the speed you want. There's no waiting for code schedules, no trouble keeping a station tuned-in.

You increase your speed—"After acquiring a speed of about 12 words per minute, it seemed impossible for me to make any further progress. Then I was advised to try the Instructograph.

After using your machine 3 months, I had increased my speed to 25 words per minute and passed the Government examination without any trouble," says another Instructograph user.

Do You Know These Facts?

Every resident and extension school uses a machine with a perforated tape to teach their classes. The Government examinations for both Amateur and Commercial tickets are always given by a machine, using a perforated tape.

If there was a better way to teach code, they would have it—but they use a machine with perforated tapes.

So does Instructograph—10 double perforated tapes (about 2000 feet of characters), graduated from very slow to very fast, are supplied with each Instructograph sold or rented.

DON'T DELAY!

If you want to learn the Code—

If you want to qualify for Amateur or Commercial examinations—

If you want to increase your speed to that of a real "Ham"—

Buy or rent an **INSTRUCTOGRAPH**.

Terms are very reasonable. Rental may be applied on purchase price. Transportation charges are paid to all parts of the United States. Extra tapes sold separately, if desired. Write TODAY for full details. No obligation.

7-POINT MIKE FELL 20 FEET

...STILL GOOD AS EVER

Johnston P. A. Service, Oneonta, N. Y., writes us: "We are certainly well pleased with your velocity mike (the 7-Point Mike). We believe that **no other mike can take the punishment it has and still work.** One time it fell 20 feet to the ground. And dozens of times it has seen rain. We use it in our mobile outfit, and it's just as good as ever. **Also a wonderful help in eliminating accoustical feedback.**" Guaranteed. Order from your wholesaler, or write for illustrated Bulletin 72.

NO FEEDBACK with speakers full blast

"I set it up in the booth, and with the gain wide open I was able to completely eliminate feedback by turning the microphone at right angles to the monitor speaker." Thus writes the engineer of a large theatre (name on request). He continues, "The mike has plenty of gain. The quality, sensitivity, and directional effect are better than any other mike I have ever tested or heard." Order from your wholesaler. Or write for Bulletin 73C.

You Depend on A. R. R. L. for Your Amateur Radio...

Do You Support the League with Your Membership?

For More Than Twenty Years

the A.R.R.L. has been the organized body of amateur radio, its representative in this country and abroad, its champion against attack of foreign government and American commercial, its leader in technical progress.

You Owe Your Amateur Radio
of Today to A.R.R.L.

Had It Not Been for the League...

- amateur radio would never have reopened after the World War
- the swarming influx of broadcasters in 1922 and 1923 would have killed it off by legislation
- recent international conferences would have virtually wiped amateur radio from the face of the earth.

The A.R.R.L. could not have achieved these successes without the loyal support of the active amateurs of this country—without the presence of their names on its membership rolls.

YOUR name should be there. Without it, we lose your tangible support. Without it, you lessen our ability to act most effectively in the protection of your hobby.

DEPENDABLE For Your TRANSMITTER!

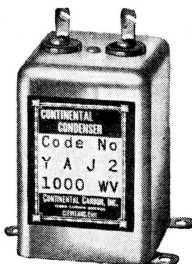

CONTINENTAL engineers have de-
veloped these compact high-voltage non-
inductive condensers especially to meet
the requirements of amateur transmitters.
1000-1500-2000 volts.

They provide at extremely reasonable
price, a wax-impregnated high voltage
filter unit, capable of withstanding severe
overloads. Ratings are conservative.
These new "W" condensers are not only
compact, but extremely attractive in ap-
pearance. Binding post terminals are pro-
vided on top; these are the new type

THERE MUST BE REASONS... why R/9's circulation has quadrupled in one year!

HERE ARE SOME OF THEM:

- ◆ Robert S. Kruse is R/9's Technical Editor. Long famous as Technical Editor of "QST", he needs no introduction.
- ◆ R/9's technical standard is exceeded by no amateur publication. Yet it is lucidly written. Kruse's famous style removes the "dryness" of technical writing.
- ◆ R/9 tells you what apparatus will do, not confining itself to makers' "ratings".
- ◆ R/9 remembers that its readers include all classes from beginners to competent engineers.
- ◆ R/9 has been doubled in number of pages, and increased in page size.
- ◆ R/9 uses the best paper and typography of any radio magazine. You're proud of your copies. 4-color work is occasionally included.
- ◆ R/9 is independent; it is not run by any clique; it is nobody's catalog.
- ◆ R/9 is of, by, and for hams—exclusively.
- ◆ R/9's subscription rates are reasonable.

"Pretty Soft"

Not that I'm a softie... but with my new shaft of aluminum you can almost "bite" me off with a good pair of pliers... in fact a few swipes with a file and I'm down to the required size. Just another refinement that makes it so much easier to use me in a replacement job. And do I work smooth?... ask thousands of servicemen... ask the world over who all use CENTRALAB RADIOHMS for ALL their jobs. Don't say "Gimme a Volume Control." Specify RADIOHMS the next time you stock up.

All Joking Aside

Centralab performance is a serious matter... for whether you are a ham working out a new trick circuit for the next number of the Q S O Gazette, or whether you are taking the kinks out of Old Man Gotrock's 1929 Blooper... you'll need a volume control that is smooth, efficient and satisfactory.

You'll turn to CENTRALAB Radiohms if you are wise to what's best in Volume Controls. Which goes of course for CENTRALAB'S Fixed Resistors, Motor Radio Suppressors and Sound Projection Controls as well.
